Camero opens office in Tyson's Corner, Virginia

First public demonstration of the Xaver™ 800 'Through-Wall Vision' system to take place in Boston

Tyson's Corner, October 11, 2006. Camero Inc. is pleased to announce the opening of its new office in Tysons Corner, Virginia, to meet the growing demand for its market-leading Xaver™ 800 'Through-Wall Vision' system. The Xaver™ 800 generates real-time, three-dimensional images of stationary and moving objects concealed behind walls. The new premises will include a demonstration facility for the Xaver™ 800.

"These are exciting milestones for our company," said Aharon Aharon, CEO of Camero. "Our new office will support Camero's growing customer base. The Through-Wall demonstration facility located in our new offices will enable potential users to experience the life-saving capabilities of the Xaver™ 800 for themselves and is a key part of the rapid expansion of our U.S. operations."

"Opening this new office underscores Camero's commitment to providing the U.S. Military, Law Enforcement and Search & Rescue communities with our unique products," said Robert (Bob) Judd, President of Camero, Inc.

"We are delighted to have Camero join the many companies in Fairfax County that are doing business with the federal government," said Gerald L Gordon, PhD., president and CEO of the Fairfax County Economic Development Authority. "Camero is the latest of several Israeli companies to expand in the U.S. market by establishing offices in Fairfax County, and it is a great location that mates technologies with market opportunities."

Tysons Corner was selected as the site for Camero's new office for a number of reasons. "We are strategically located in Fairfax County, midway between Washington, D.C. and Dulles International Airport, in a technology hub and in one of the country's leading business centers," added Judd. "Virginia's strong, diverse economy and abundant business infrastructure resources were also motivating factors."

Camero, Inc. has Xaver™ 800 systems available for demonstration at its new Tyson's Corner offices. In addition, law enforcement professionals will be able to see a live demonstration of the Xaver™ 800 3D images of people behind walls, during the Annual Conference of the International Association of the Chiefs of Police, to be held in Boston, October 15th to 17th, 2006. To pre-schedule an appointment at Camero's booth number 501, please contact Beth Skoll at +1 703-752-6640.

About Camero:

Camero has developed the revolutionary Xaver™ 800 'Through-Wall Vision' system which generates real-time, three-dimensional images of stationary and moving objects concealed behind solid barriers. This first-of-its-kind capability enables the rapid

completion of life-saving operations while greatly reducing the severe risks involved for those operating in life-threatening environments.
